

# Analysis Cubes

Analysis Cubes for Wennsoft can help you analyze your Wennsoft Job Cost or Service Management data.

- **EASILY** identify trends in your business with graphical analysis tools
- **FLEXIBLE** analysis of sales, cost of sales, and margin by period
- **POWERFUL WIP** Analysis by company, division, customer, etc. including the ability to calculate Forecast Revenue or WIP as at any date in history as well as age WIP

"We took advantage of a live Analysis Cubes demo on our data and knew instantly that it was the solution we were looking for. Management had only two questions—when could we get it and how much would it cost."

Deb Stanek  
Badger West

"Analysis Cubes from Professional Advantage has allowed Stanley Elevator deeper access to WennSoft Service information. Many hard to get metrics are now in the hands of our managers, in an easy to use and understandable format. This is allowing improved decisions based on the trending capabilities of the Analysis Cubes for WennSoft. Questions such as "show me the trend to a contract, by percent of escalation, year over year, as compared to actual cost, year over year" can now be answered with ease. Displayed as a Pivot Chart, the impact that these graphical representations have is amazing!

As an early adopter of Analysis Cubes for WennSoft, we have found working with the staff at Professional Advantage extremely easy and concise. The technical skill in planning for the deployment, and professional demeanor proved indispensable as we progressed through the project. The true benefit to Stanley is forging a strong relationship that we can use to solve our real world business problems as they surface. After all is said and done it is our partnerships that help us drive value to our bottom line."

Raymond C. Peebles Jr.  
Logistic and IT Manager, Stanley Elevator Company Inc.
