

Systems Administration for SunSystems v4.3

Duration: 1 Day

Prerequisite: No knowledge of SunSystems is assumed.

Who Should Attend:

Those responsible for maintaining the system such as IT personnel and the SunSystems System Administrator.

What You Will Learn:

At the completion of this training session participants will be competent to:

- Assist in development of a strategy for implementing facilities such as security and general systems maintenance for SunSystems and its companion software.

Please see over page for course content

Course Content – Systems Administration for SunSystems v4.3

Introduction to SunSystems 4.3

- Overview of SunSystems 4.3
- The SunSystems program directory
- The SunSystems directories
- Understanding work files
- Understanding print files
- Using the SUN.INI file

Global Security and User Manager

- Understanding the global security framework
- Working with User Manager
- Managing the security policy

Creating and Maintaining Users and Operator Groups

- Defining new SunSystems users
- Creating operator groups
- Defining miscellaneous permissions
- Applying menu items

Data Access and Auditing

- Creating and applying data access groups
- Auditing global security
