Unbeatable offers for migrating Windows Server and SQL Server to the cloud

Whilst innovation has supplanted cost savings as the primary driver of cloud migration for many businesses, moving to the cloud needs to make sense for your bottom line.

A recent Microsoft study found that enterprise clients considering cloud migration for Windows Server were

30%

more likely to choose Azure due to its intelligent security, seamless hybrid capabilties, and unique cost savings options.

Microsoft Azure

AWS

AWS is **5x** more expensive than Windows Server and SQL Server*.

UNBEATABLE OFFERS

The lowest cost of ownership by combining unique pricing options and extended security updates

Free extended security updates for Windows Server 2008 and Windows Server 2008 R2

"Using Azure Hybrid Benefit, we'll be able to reduce our overall costs by up to 82%.

— Jeff Brady,
Senior Program Manager, Allscripts

*Prices are as of 24th October 2018 and subject to change. Actual regional pricing and program discounts may apply. Actual savings may vary based on region, instance size, and performance tier. Savings exclude Software Assurance costs, which may vary based on Volume Licensing agreement. Contact your sales representative for more information.)
