

# QlikView

## Seeing is Believing

**SIB OFFER**

### Test drive QlikView on your own data – minimum risk and maximum gain

By now you have probably seen a demonstration of QlikView on demo data. The next step in your exploration of QlikView is to look at your own organisation's data. We call this process Seeing is Believing (SiB).

#### Why do it?

Remember the saying "You don't know what you don't know"? Until you take a dive into your own organisation's data with QlikView it will be hard to grasp the full power of what it can do for you. A generic QlikView demonstration is a good start, but it shows some imaginary companies and situations which may not 'connect' with your own issues. By doing SiB you will have a REAL reporting system, working on your REAL company data, used by your people to find REAL answers. And most likely you'll make some unexpected but beneficial discoveries during the SiB.

#### What is SiB?

A dedicated QlikView expert consultant will work in collaboration with you for 3 days. At the end of this period, Professional Advantage will present a functional QlikView application to your business, connected to your data, running on your systems and accessible by up to 25 users. You and your team will then be able to use it to drill into your data and explore its potential for the duration of the evaluation period.

Contact us to arrange your SiB

T: 1800 126 499

E: [qlikviewinfo@pa.com.au](mailto:qlikviewinfo@pa.com.au)

#### What does SiB cost?

The SiB engagement delivered in three days will cost \$5,040 – just our consultant's time. At the end of the evaluation period, you will be able to clearly see QlikView's value to your business and discuss next steps for your data discovery journey. Professional Advantage will look to leverage the learns from your SiB investment rather than start from scratch.

#### What others are saying

*"One bonus of QlikView is how quickly we can produce solutions. The CIO came to me wanting a dashboard for the IT service desk. I was able to knock something up in less than a day and it's been running ever since. We now realise how good QlikView was for rapid deployment."*

**Jon Taylor, Business Analyst, Genea**

*"From the moment I saw QlikView I knew that I had found the best reporting solution... It illuminates the darkest corners of my business and is so fast and flexible that even I can use it!"*

**Mark Gray, Managing Director, Goldline Distributors**
