

What's New with Microsoft Teams

Microsoft Teams has released a new set of features that will further enhance user experience! With working remotely becoming more essential to business continuity, these improvements to Microsoft Teams will surely boost your productivity, enhance collaboration, and improve communication.

10,000 USERS PER INDIVIDUAL TEAM

Team members per channel are up from 5,000 to 10,000 users to cater for larger organisations with bigger staff size per department.

250 USERS IN ONE GROUP CHAT

Host a group chat for an even larger number of users with Teams' latest iteration.

ACCESS TEAMS OFFLINE

No internet connection? No problem. Access Teams without internet connection and sync when you go back online.

CUSTOM BACKGROUNDS

Use professional or fun photos to personalise your background during online meetings.

BACKGROUND NOISE REMOVAL

Say goodbye to distracting and unnecessary sounds during your calls.

OFFLINE & POP-OUT CHATS

Switch between conversations in separate windows whilst being able to read and draft messages offline.

RECALL SHARED SCHEDULE

Recall and update single or multiple shared schedules.

RAISE HAND FEATURE

Show your intention to speak in large or busy meetings with a simple click of a button.

SCHEDULE FILTERING IN SHIFTS

Manage shifts of your team by filtering by team member or by shift schedule.
