

Securing your systems with smart solutions

A data-driven, human-guided security approach detects and responds to attacks more quickly and accurately. With the Microsoft global network of real-time threat intelligence services, it continues to evolve, anticipate, and stay ahead of risks.

Microsoft real-time security stats

40M+

lines of data reviewed per day.

Real-Time

Analyst feedback is incorporated daily in order to adapt to threats in real-time.

100-200

suspicious events flagged for human analysis per day.

85%

of cyberattacks detected after three months of learning feedback.

5X

fewer false positives than machine-only systems.
