

**Work securely
anytime, anywhere
with Microsoft 365
Business**

Being able to access a unified solution that has the scalability, security, and governance that Microsoft 365 does; there's no competitor that can do it in the same way.

— Jarryd Aleckson, IT Manager, ATSIHCS Brisbane

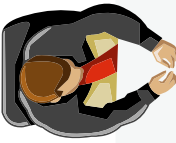

Microsoft 365 Business provides small to mid-sized organisations with access to the Office productivity suite that their business users love and are familiar with, including online conferencing, business-class email, communication portal, business process workflows, and more. This license bundle is recommended for small to mid-sized organisations with less than 300 users.

This data sheet serves as a quick feature and price comparison of the more popular Microsoft 365 Business SKUs purchased mainly by SMB clients at Professional Advantage. We highly recommend the Business Premium SKU for organisations that need real-time communication, access to files anytime, anywhere on any device, and streamlined collaboration whilst having built-in protection against cyber threats.

Prices are subject to change without notice, so please contact us for the confirmed pricing or if you need further guidance.
