

kwiktag® for Dynamics AX

Your Complete Solution for Dynamics AX Document Management

Hack Through Document Clutter and Get Greater Performance from Dynamics AX

KwikTag for AX delivers instant access to scanned paper and electronic files anywhere within Dynamics AX. KwikTag extends access to a Web browser—so even your non-AX users can get the information they need, wherever they need it. Beyond document capture, KwikTag for AX offers powerful workflow for automating any document-driven business process.

Radically Simplify Data Entry and Document Capture

Capture paper and electronic files without slowing down data entry

With KwikTag for AX, your AX users can associate documents to AX transactions quickly and easily. Select the “Tag” button from any AX form to capture paper or electronic files. Scan paper documents at your convenience, and KwikTag automatically associates them with the right AX transaction. For electronic docs, simply browse or drag-and-drop from any AX form. Over 35 AX forms are available out of the box—with support for custom forms or fields.

Dynamics-integrated and stand-alone document management platform

Easily access scanned paper or electronic files from Dynamics AX

See all related documents wherever you need them

Document associations delivers complete visibility to every process-related document or file

Document access for BOTH ERP and non-ERP users

kwiktag® by Imagetag

Lifehacking: Taking control of your priorities through process automation and the ruthless elimination of clutter and interruptions.

Instant Access to Your Documents and Files

Access everything directly from Dynamics AX —or from a Web browser

View ALL transaction-related documents and files with the click of a button, making payables or receivables matching a breeze. Or, search for documents globally, by keyword or related AX data. All documents are securely stored on your KwikTag server, without impacting the performance of your AX system.

A Platform for Process Automation and Innovation

The KwikTag workflow platform includes built-in functionality allowing you to gain control of data, documents and decisions. Built-in workflow functionality allows you to customize KwikTag so that you can automatically route data and documents for approval based on your business rules. Non-AX users can review documents and related AX data via the Web, or approve them via email.

Designed to be flexible enough to support your unique business needs, KwikTag allows you to personalize document routing, related alerts/notifications and status reports for a wide range of documents and related business processes.

Contact your ImageTag representative today and schedule a live demonstration.
