Information Protection and Compliance Solution

FOR AN IT MANAGER

Before iWorkplace
The Overloaded IT Manager

After iWorkplace
The Information Protection Hero

INFORMATION PROTECTION CHALLENGES
Typical information protection situation.

iWORKPLACE SOLUTION
Information protection and compliance based on Microsoft 365 and SharePoint.

Before	After
Manual provisioning of folders and metadata tagging.	Auto provisioning of folders with metadata automatically applied as a result.
Limited Microsoft Teams governance.	Built-in Teams integration and governance.
Manual, time-consuming set up of SharePoint sites and information architecture.	Up to 80% time savings on streamlined deployment.
Low user adoption of disparate, difficult-to-use records management systems.	Achieve strong user adoption with familiar tools in Microsoft 365, such as SharePoint and Teams.
Lack of governance of home or personal drives.	Built-in reporting of OneDrive usage per user.
Difficult to maintain multiple systems for collaboration and records.	Single cloud-based platform for content and records management.
