

Power Apps Proof of Concept

Put your real-life process automation scenarios to the test with our Power Apps Proof of Concept.

Are ready-made apps too expensive, but typical custom-developed apps take too long to complete? Power Apps might be your solution.

Part of the Microsoft Power Platform product family, Power Apps is Microsoft's low-code application development environment that lets you build business apps in a matter of days!

Professional Advantage's Power Apps Proof of Concept (POC) will assist in your ideation process and evaluate Power Apps' suitability with your organisation's business process automation needs and test your app's viability. We will plan with you what can be reasonably accomplished during the POC and discuss the expansion of the scope as necessary.

Key Benefits:

1. Assess and evaluate your app's feasibility in Power Apps within five days.
2. Make a business case for furthering your business process automation initiatives to key decision-makers.
3. Use your internal business processes to develop an automated workflow or form trial.
4. Understand what's possible with Power Apps and Microsoft 365 and evaluate its fit for your organisation.
5. Start small now, then extend your app's functionalities when needed.

Engagement Highlights and Deliverables

A typical 5-day Power Apps POC will walk you through the following steps and deliverables.

Pre-kick off

2-hour assessment for an initial data gathering and analysis of your requirements.

Day 1

Discovery

Day 1 will walk you through the Power Platform tools and a review of your business process challenges, as well as the security you require from the app.

Day 2-4

Solution Build

Days 2 to 4 will be the actual app building phase. It will also include testing, fixes, minor changes, and implementation.

Day 5

Training, Q&A, Executive Presentation

Day 5 is dedicated to executive presentation to determine the next steps, Power Platform roadmap and future governance framework. This will also leave room for Q&A at the end of the session.
