professional advantage

Case Study
Allied Health Australia

Allied Health is a health and wellness organisation that specialises in workplace injury rehabilitation and well-being restoration. These services are delivered through two of its companies—Pinnacle Rehab and Peak Conditioning—both operating in Crows Nest, New South Wales.

The company has been operating for more than 20 years, working with Allied Health professionals in delivering specialist healthcare services.

Industry	**Number of staff**	**Solution**
Healthcare Organisation	135	Microsoft Azure and Office 365

Challenges

- Security risks with running their Office 365 environment on a "Shared Tenant".
- 5-week window to urgently migrate a substantial number of business-critical apps to Microsoft Azure.
- Several log-ins needed to log in to their desktops, laptops, and phones.

Results

- Improved security with dedicated Office 365 tenant environment.
- Reduced log-ins with Single Sign-On (SSO) capability.
- Improved bandwidth from 250 Mbps to 1 Gbps Azure Express Route.
- Migration from Citrix Remote Access Infrastructure enabled unnecessary IT licensing and operational costs.
- Remote access to desktop and applications for part-time and contracted staff.

"The Professional Advantage team is solutions-orientated. They try to find ways to help us get the implementation to occur despite a lot of timeframe challenges. They were truly effective, knowledgeable, and have helped us with staying on top of the implementation. They have a good understanding of the sensitivity of moving environments and data and have made the transition relatively seamless for our end-users."

Kevin Garvey, Director of Allied Health Australia
