## Microsoft

Benefits of Azure Virtual Desktop

Bring your own device

Remote employees can securely access company resources from their own unmanaged devices.

Device cost

Run programs inexpensively from your devices, like thin clients, Chromebooks, and NUCs.

Data protection

Reduce unused processing power based on the user's and team's needs.

Whitelisted access

Create virtual workspaces securely with Azure Virtual Desktop and Azure NAT Gateway.

No VPN slowdown

By migrating to Azure Virtual Desktop, you gain more scalability for crisis events.

Working remotely

Azure Virtual Desktop allows you to easily work from home.
