# Integrated experience within Microsoft 365 for managing your policy lifecycle

Collaborate on and manage all your policies in one place.

Professional Advantage's Policy Management Solution Accelerator leverages the integrated apps in Microsoft 365 such as SharePoint, Teams, Power Apps, and Power BI, to streamline your policy management lifecycle.

It allows you to get more value from your software investment whilst enabling a better, connected user experience. It removes the complexities of building a fully functional policy management hub from the ground up with 100% customisable components.

Leveraging the integrated apps in Microsoft 365

- SharePoint
- Teams
- Power BI
- Power Apps
- Power Automate
- Copilot for Microsoft 365
- Microsoft Defender
- Conditional Access

Professional Advantage's **Smart Platforms** leverage purpose-built solutions to achieve more with Microsoft 365 and create an integrated and first-class experience for your users. Our Policy Management Solution Accelerator is composed of these core components:

01 POLICY HUB
A dedicated site within your SharePoint environment where you can publish and distribute policies for employees to read or acknowledge. It is accessible in your Intranet Portal or Microsoft Teams.

POLICY MANAGEMENT APP
It is an easy-to-use application built on Power Apps that provides your policy managers with a dashboard detailing high-level statistics of your policies such as pending approvals, overdue and in-date policies (valid and not yet expired), and can change the authority matrix, workflows, and policy templates.

02 POLICY ACKNOWLEDGEMENT APP
Switch from Excel-based to digital employee acknowledgement monitoring with SharePoint. Simplify compliance and establish accountability by automating and tracking the employee acknowledgement process for new and updated policies within your SharePoint environment.

03 EXECUTIVE DASHBOARD
With Power BI, you can save time generating compliance reports. Through an executive dashboard, compliance managers and department heads can quickly visualise different types of policies, the total number of policies in the system, and policies by status.

As a long-time and trusted Microsoft Partner, we can:

01 Assess. Get our experts to evaluate your existing policy management practices and uncover opportunities to streamline them with Microsoft 365.

02 Analyse. Collaborate with us to define your unique business goals and challenges that Microsoft 365 can address.

03 Plan. Together we'll develop a customised roadmap along with timelines and effort required to maximise Microsoft 365's impact.

04 Implement. Our experienced team of SharePoint solution architects and consultants will use our proven methodologies to deploy and implement a solution based on your needs.

05 Train and Support. Benefit from our comprehensive change management approach, training, and post-implementation support to empower your team for success.

Optimise your policy management process with Professional Advantage

Connect with us today to start your journey to a streamlined policy and procedure process with Microsoft 365. Our 20-year track record of success is a testament to our experience and expertise in designing digital workspaces that work.
